SFU

CONSENT FORM

Title of Study: CMPT 863 Class HCI Research Projects
Study Number: 30004094
Department or Faculty: Computing Science

Student Investigator: Oliver Stutz, osa37@sfu.ca
Course Instructor: Lawrence Kim, lawkim@sfu.ca

INVITATION AND STUDY PURPOSE

This is my study project for CMPT 863 @ Simon Fraser University, its purpose is to study Human Computer Interaction and provide data for me to learn how a HCI study works.

This study is taking place to fill the requirements of coursework for a student researcher. You are being invited to take part in this research study because you could be an eligible board member one day and take the decisions the study presents.

VOLUNTARY PARTICIPATION

Your participation is voluntary. You have the right to refuse to participate in this study. If you decide to participate, you may still choose to withdraw from the study at any time without any negative consequences to yourself. To withdraw please contact the student researcher or course instructor.

Your participation is voluntary. You have the right to refuse to participate in this study. If you decide to participate, you may still choose to withdraw from the study without any negative consequences. To withdraw please exit the survey screen at any point before you submit your responses. Due to the confidential nature of this survey we will not be able to remove your answers once they have been submitted.

STUDY PROCEDURES

If you agree to the study, you will be guided through a web based simulation which allows us to perform the study on your decisions.

The study will take aproximately 10-15 minutes of your time. In the last part of the study we will give you all the information which might otherwise influence your decisions during the study.

If you agree to participate here is how we will do the study:

- We will guide you through a simulated boardroom
- As a board room member you have the option to participate and interact with the CISO”s Budget approval meeting.

- If you decide to take part in this research study, here are the tests and procedures we will do: We will ask you to consent to participate, During the study we will present you the boardroom simulation. At the end of the study: we will show you what topic we are studying in detail, while we don't want to influence you prior to the study in any way regarding the field. The study is within the ethics of such a study.
- This is a single participation study, after submitting the final form you are done.
- There are no recordings of your voice or camera. The sole inputs are those you enter with your mouse and keyboard. We don't ask for your name so the study will be anonymous by default.

POTENTIAL RISKS OF THE STUDY

- There are no foreseeable risks to you in participating in this study.
- We do not think there is anything in this study that could harm you or be bad for you. Please let us know if you have any concerns.

POTENTIAL BENEFITS OF THE STUDY

- There are no direct benefits for you participating in this study besides facilitating my coursework and possibility to learn more about HCI and the actual study itself.
- We do not think taking part in this study will help you. However, in the future, others may benefit from what we learn in this study.

CONFIDENTIALITY

We will keep all the gathered data confidential, the online simulation will be decomissioned after the study. The sole identifier which could identify you is solely used to identify double submissions and will be stripped from the data once the study is performed to protect your anonymity.

- All data which could potentially identify you or indicate you participated will be held confidentially and encrypted.
- All study data will be stored encrypted at REST with AES-256-GCM.

- "This **simulation** is hosted **on GCP**, a US company, and as such, any data you provide may be transmitted and stored in countries outside of Canada, as well as in Canada. It is important to remember that privacy laws vary in different countries and may not be the same as in Canada." The data resides physically in the Montreal Data Center of Google but it cannot be controlled to an extent that google could not copy the data away while the study is beeing performed and analyzed. Access control of the account is in place, secured by 2FA.

STUDY RESULTS

The results of this study will be used to complete course requirements for CMPT863 G100 Advanced Topics in Human-Computer Interaction.

CONTACT FOR COMPLAINTS OR CONCERNS

If you have any concerns about your rights as a research participant and/or your experiences while participating in this study, please contact the Director, Research Ethics and Security at hreb@sfu.ca or 778-782-6593 or **COURSE INSTRUCTOR Lawrence Kim, lawkim@sfu.ca**

FUTURE CONTACT

As we don't have your name, email or phone number, there will be no future contact.

PARTICIPANT CONSENT

Taking part in this study is entirely up to you. You have the right to refuse to participate in this study. If you decide to take part, you may choose to withdraw from the study at any time without giving a reason and without any negative consequence to yourself.

- Your click on the acceptance button indicates that you have received a copy of this consent form for your own records.
- Your click on the acceptance button indicates that you consent to participate in this study.
- You do not waive any of your legal rights by participating in this study.

This form accompanied by your electronic "consent" through clicking "I accept the terms and would like to participate in the study" will form a legally binding consent.
